# EDUCATION

| JULY 2024<br>2021 | Doctor of Philosophy in Artificial Intelligence - Institut Polytechnique de Paris Ph.D.'s Thesis: Evaluating and Improving the Reasoning Abilities of Language Models Advisors: Prof. Fabian Suchanek and Prof. Chloé Clavel |             |
|-------------------|--|-------------|
| 2017<br>2015      | Master of Science in Computer Science - American University of Beirut Master's Thesis: Arabic Named Entity Recognition via Deep Co-learning Advisor: Prof. Shady Elbassuoni  | GPA: 3.68/4 |
| 2014<br>2010      | Bachelor of Science in Computer Science - Notre Dame University - Louaize Final Year Project: Educaly - An Educational Social Network Advisor: Prof. Marie Khair   | GPA: 3.63/4 |

## Selected Work Experience

Present Jan. 2021 Graduate Research Assistant - Institut Polytechnique de Paris, France

- MAFALDA: A Benchmark and Comprehensive Study of Fallacy Detection and Classification [1]:
  - Designed a novel taxonomy of fallacies.
  - Proposed an annotation framework customized for fallacy classification and introduced an evaluation metric to address subjectivity within fallacy classification.
  - Built a benchmark to assess the performance of language models in detecting and categorizing fallacies.
- TINA: Textual Inference with Negation Augmentation [2]:
  - Proposed a probabilistic definition of Textual Entailment (TE) and used it to augment TE datasets with new entailment relationships automatically.
  - Explored various models fine-tuned with augmented datasets using an unlikelihood loss to enhance language model robustness in Textual Entailment tasks, particularly those involving negation examples.
- Logitorch: A PyTorch-based Library for Logical Reasoning on Natural Language [3]:
  - Developed a Python library on top of Pytorch for logical reasoning with diverse benchmarks, models, and utility functions, simplifying dataset utilization and model training.
- Reasoning with Transformer-based Models: Deep Learning, but Shallow Reasoning [4]:
  - Wrote a survey paper on the performance of Transformers on various reasoning tasks, highlighting both their successes and limitations, including empirical and theoretical aspects.

Dec 2020 Research Engineer - Institut Polytechnique de Paris, France

SEP 2020 Investigated performance of Transformers on different reasoning tasks [4].

Aug 2020 Oct 2017 Research Assistant - American University of Beirut, Lebanon

- Retrieving Textual Evidence for Knowledge Graph Facts using Deep Learning:
  - A project in collaboration with Aalborg University (Denmark) and Hacettepe University (Turkey).
  - Investigated Transformer-based models trained with a dataset generated using distant supervision to rank passages based on their relevance to a given fact in the form of a Resource Description Framework (RDF) triple.
- Predicting Arabic Blog Credibility using Deep Co-learning [5]:
  - Implemented and evaluated a novel semi-supervised learning approach based on an algorithm called Co-training, which was adapted to the context of deep learning for the task of Arabic blog's credibility prediction, which can be trained using a small labeled dataset and a large unlabeled dataset.
- Automated Detection and Measurement of Corneal Haze and Demarcation Line in OCT Images [6, 7, 8, 9, 10]:
  - A project in collaboration with the Department of Ophthalmology (American University of Beirut Medical Center) and the ELZA Institute in Zurich (Switzerland).
  - Redesigned an outdated software to detect and measure corneal haze and demarcation line in different types of Optical Coherence Tomography (OCT) images.
  - Added new features and introduced deep learning methods to the software.
  - Developed OCTAnalysis.com, a web interface of the software in Django/Python and Postgres SQL.
  - Proposed and implemented a semi-weakly supervised learning approach to segment the area between the top boundary of a cornea and the demarcation line in OCT images.
  - Developed a SegNet neural network to detect the boundaries of a cornea in OCT images and a VGG-16 neural network to detect artifacts in OCT images.
  - Supervised two undergrad students who annotated a large dataset of OCT images.
  - Developed an image segmentation tool for labeling.

Sept 2017 Graduate Research Assistant - American University of Beirut, Lebanon June 2016

• Arabic Named Entity Recognition via Deep Co-learning [11, 12]:

- Built a supervised deep learning model that infers the name entities' class in a Wikipedia article by classifying their Wikipedia pages into one of four classes: person, location, organization, or miscellaneous.
- Generated a large dataset of partially annotated Wikipedia articles for the task of Arabic Named Entity Recognition (NER).
- Proposed a novel semi-supervised learning approach based on an algorithm called Co-training, which was adapted to the context of deep learning for the task of Arabic NER and which can be trained using a small fully annotated dataset and a large partially annotated dataset.
- Evaluated our proposed Deep Co-learning algorithm approach on three Arabic NER datasets.

#### • ICD and CCS Coding using Deep Learning [13]:

- A project in collaboration with the Department of Emergency Medicine (American University of Beirut Medical Center).
- Designed and implemented a deep neural network architecture to predict the International Classification of Diseases (ICD) code and Clinical Classifications Software (CCS) single-level code of a discharge diagnosis.
- Methodical Evaluation of Arabic Word Embeddings [14]:
  - A project in collaboration with Qatar University.
  - Built the first word analogy benchmark designed specifically for Arabic word embeddings.
  - Implemented different Long Short-term Memory recurrent neural network architectures to evaluate Arabic word embeddings on two NLP tasks: Document Classification and Named Entity Recognition.
- Adaptive QoS for Spark Applications [15]:
  - Developed an adaptive quality management/selection method for Spark applications.
  - Implemented different QoS policies in Java.

# Teaching Experience

Teaching Assistant - Institut Polytechnique de Paris, France Aug 2023

July 2021

- Bases de données
- Données du Web
- Mise en pratique Données du Web
- Mining of Large Datasets

May 2020 **Teaching Assistant** - American University of Beirut, Lebanon

Feb 2015

- Artificial Intelligence
- Introduction to Programming
- Compiler Construction (graduate course)
- Machine Learning (graduate course)

June 2013 **Teaching Assistant** - Notre Dame University - Louaize, Lebanon

Feb 2013

- Program Design and Data Abstraction I
- Program Design and Data Abstraction II

# OPEN SOURCE PROJECTS

Present **LogiTorch** - Creator and Maintainer

**DEC 2021** LogiTorch [3] is a PyTorch-based library that includes different logical reasoning benchmarks, different models, as well as utility functions such as co-reference resolution. The library allows researchers and developers to easily use a logical reasoning dataset and train logical reasoning models with just a few lines of code.

#### SKILLS

Python, Java, C++, PyTorch, Pandas, Numpy, Keras, LATEX

### Reviewer

AI Review, NAACL 2024, ACL 2023, EMNLP 2022, EACL 2022 (External Reviewer)

#### AWARDS

- 2018 Recipient of the Best Computer Science Graduate Student Award from the American University of
- 2015Awarded a full graduate assistantship from the American University of Beirut.
- 2014 Graduated from Notre Dame University - Louaize with high distinction.
- Awarded a scholarship from Notre Dame University Louaize. 2013
- 2013 Dean's List for the Spring semester.
- 2012 Dean's List for the Spring and the Fall semesters.

# SUMMER SCHOOLS ATTENDED

- 2023 Oxford Machine Learning Summer School (OxML), Oxford, United Kingdom.
- 2021 Machine Learning Summer School (MLSS), Taipei, Taiwan.
- 2021 4th Advanced Course on Data Science and Machine Learning (ACDL), Tuscany, Italy.
